

Instructions: Read the scenarios and select the best option for each student.

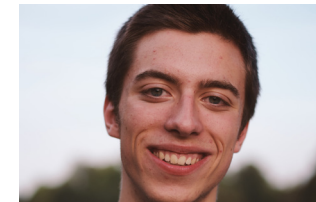

1. Casey knows that she wants to continue her education after high school. She has started to explore her options and all of the types of postsecondary education that are available to her. She is just starting this process, so she wants to gather information from a few different options.

The best option for Casey is to: _____

- Call every college of applied technology and ask for information
- Attend the college fair at her high school
- Visit the websites of only the inclusive higher education programs

2. Andrew wants to become a dental hygienist and knows he will need to get an associate degree. He wants to find a program that is close to home so he can live with his family and save money.

The best option for Andrew is a: _____

- 2-year community college that is 20 minutes from home
- 4-year Inclusive Higher Education Program that is 3 hours from home
- 4-year University that requires freshmen to live on campus

3. Cora has an intellectual disability and is graduating high school with a Special Education Diploma. She wants to continue her education in order to learn more about employment and independent living.

The best option for Cora is a(n): _____

- 4-year University that offers classes in all academic subjects
- College of Applied Technology that offers classes only for a specific job
- Inclusive Higher Education Program that offers classes on career development and self-advocacy skills

4. Owen loves computers and wants to get a job in computer programming. After doing some research, he learned that he needs a bachelor's degree. Owen is getting a regular high school diploma and needs to find a program that is the best fit for him following graduation.

The best option for Owen is a: _____

- 4-year Inclusive Higher Education Program
- 4-year College where he can earn a bachelor's degree in Computer Science
- 2-year College of Applied Technology where he can earn a Technical Support Certificate

5. Maggie knows she wants to enroll in postsecondary education after graduating high school but doesn't know where to start in finding the right school. She wants to attend a college fair so that she can learn about all of her options and ask questions. She only wants to take classes that are training her for the job she wants. Which career fair table should she visit?

The best option for Maggie is a(n): _____

- Inclusive Higher Education Program
- College of Applied Technology
- 4-year University

6. Logan loves working with cars and wants to get a job as an auto mechanic after graduating high school. Logan knows he will need to attend a postsecondary program to learn more about being a mechanic and to obtain a certificate.

The best option for Logan is a(n): _____

- College of Applied Technology
- Inclusive Higher Education Program
- 4-year University

7. Meredith is interested in writing and wants to get a degree in journalism after graduating high school. She wants to enroll in a program that offers on-campus housing because she wants to move away from home and be more independent.

The best option for Meredith is a: _____

- Community College with no housing options
- College of Applied Technology with some housing options
- 4-year University with on-campus dorm housing

8. Liam has found a few colleges that he is interested in and wants to learn more about them individually. He wants a chance to see the campuses and ask questions but isn't able to travel on the dates that tours are available.

The best option for Liam is a(n): _____

- In-person tour
- College fair
- Virtual tour

9. Christina has an intellectual disability and will be receiving an occupational diploma when she finishes high school. She wants to have the college experience of living on-campus, while also getting more job experience through an internship and career focused classes. She wants to continue her education in a program that will support her in learning skills she will need to be independent.

The best option for Christina is a(n): _____

- Inclusive Higher Education Program
- 4-year University
- 2-year Community College

10. Derrick is interested in the health services field and wants to get a degree in nursing. He knows that there are a few degree paths to becoming a nurse but after researching, he found that an associate degree program is the best fit for him.

The best option for Derrick is a: _____

- 4-year bachelor's program at a University
- 2-year associate program at the local Community College
- Certificate program at an Inclusive Higher Education program
